

Planning Manufacturing Cells Workbook

By Lee Hales

Society of Manufacturing Engineers, United States, 2002. Spiral bound. Condition: New. Language: English . Brand New Book. This workbook is to be used in conjunction with the Fundamentals of Manufacturing Cell Planning package. The complete training package includes 3 videotapes, a textbook, a workbook, a booklet, and a coloured pencil set. All materials are based upon the proven and widely used method called Systematic Planning of Manufacturing Cells (SPMC). Together, these materials comprise a ready-to-use kit for introducing, expanding, and improving the use of cells in your plant. Tape One introduces the basics of manufacturing cells, and gives you a systematic approach for planning any kind of cell. Tapes Two and Three show how to apply this step-by-step approach. The sessions in the workbook follow the journey of a typical cell-planning project and correspond to a chapter in the text. The textbook is a comprehensive tool that provides essential details, valuable finer points, illustrations and examples.
