GRAPHENE/ GRAPHENE OXIDE DOPED MAGNESIUM DIBORIDE SUPERCONDUCTORS

Graphene/ graphene oxide
doped Magnesium diboride
superconductors

LAP Lambert Academic Publishing Nov 2013, 2013. Taschenbuch. Book Condition: Neu. 220x150x9 mm. Neuware - Owing to the high critical temperature (T_c) of 40 K, intrinsically weak-link free grain boundaries, and low fabrication cost, MgB_2 is believed to be promising for replacing conventional low T_c superconductors in many cryogen- free applications. Nevertheless, its rapid drop in critical current under applied magnetic field and low critical field exclude it from many industrial applications where a high critical current density (J_c) under...

Reviews

This is the very best publication we have read through right up until now. It is one of the most incredible book we have read through. Once you begin to read the book, it is extremely difficult to leave it before concluding.

-- **Miss Celia Volkman**

Extremely helpful to all of category of men and women. it had been writtern extremely completely and helpful. You are going to like the way the blogger compose this publication.

-- **Johathan Haag**
