Routledge. Paperback. Book Condition: New. Paperback. 720 pages. Dimensions: 9.2in. x 6.3in. x 1.0in. We live in a risk society where the identification, distribution and management of risks, from new technology, environmental factors or other sources are crucial to our individual and social existence. In *The Social Contours of Risk, Volumes I and II*, two of the world's leading and most influential analysts of the social dimensions of risk bring together their most important contributions to this fundamental and wide-ranging field. Volume I collects their fundamental work on how risks are communicated among different publics and stakeholders, including local communities, corporations and the larger society. The acceptability of risk to an individual depends on the context, whether the larger society or in, for example, a corporate framework. Their work clarifies the structures and processes for managing risks in the private sector and the factors that produce or impede effective decisions. The authors demonstrate that corporate culture is crucial in determining risk management. They analyse the transfer of corporate risk management systems from industrial to developing countries, and how globalization is spreading and creating new kinds of risk - the combination of traditional and modern hazards presented by climate change, technology transfer and economic growth. They describe the new...
