MAGNETO-OPTICS AND SPECTROSCOPY OF ANTIFERROMAGNETS

Condition: New. Publisher/Verlag: Springer, Berlin | Certain magnetic materials have optical properties that make them attractive for a wide variety of applications such as optical switches. This book describes the physics of one class of such magneto optic materials, the insulating antiferromagnets. The authors summarize recent results concerning the structure, optical properties, spectroscopy, and magneto optical properties of these materials. In particular, they consider magnetic phase transitions, symmetry effects, the linear magneto optical effect, magnons, spectroscopic study of spin waves, photoinduced magnetic effects,...

Reviews

Without doubt, this is actually the best job by any publisher. It is written in basic phrases instead of difficult to understand. You will like the way the author publishes this publication.
