Decision Analysis, Location Models, and Scheduling Problems

By H. A. Eiselt

Springer. Paperback. Book Condition: New. Paperback. 457 pages. Dimensions: 9.2in. x 6.1in. x 1.2in. The purpose of this book is to provide readers with an introduction to the fields of decision making, location analysis, and project and machine scheduling. The combination of these topics is not an accident: decision analysis can be used to investigate decision scenarios in general, location analysis is one of the prime examples of decision making on the strategic level, project scheduling is typically concerned with decision making on the tactical level, and machine scheduling deals with decision making on the operational level. Some of the chapters were originally contributed by different authors, and we have made every attempt to unify the notation, style, and, most importantly, the level of the exposition. Similar to our book on Integer Programming and Network Models (Eiselt and Sandblom, 2000), the emphasis of this volume is on models rather than solution methods. This is particularly important in a book that purports to promote the science of decision making. As such, advanced undergraduate and graduate students, as well as practitioners, will find this volume beneficial. While different authors prefer different degrees of mathematical sophistication, we have made every possible attempt to unify...
