# COMPUTER-AIDED TRANSLATION TECHNOLOGY: A PRACTICAL INTRODUCTION

University of Ottawa Press, Ottawa, 2002. paperback. Condition: New. 23cm, 185p, "Specific chapters describe tools such as optical character recognition and voice recognition systems, corpora and corpus analysis tools, terminology management and translation memory systems and localization tools. In addition to describing the tools themselves, this book also addresses issues such as how translators interact with CAT tools and what impact the use of technology may have on the translator's working life."

## Reviews

---

*A brand new electronic book with a new standpoint. It is written in basic phrases rather than confusing. It has been designed in an extremely basic way which is merely right after I finished reading through this publication where it basically altered me, change the way I believe.*

-- **Kitty Crooks**

*A must buy book if you need to add benefit. I have gone through it and that I am sure that I will go through it once more yet again down the road. I am just very happy to let you know that this is basically the best book I have ever gone through in my own life and can be the very best book for at any time.*

-- **Eldridge Reilly**
