

Seed, Soil, Sun: Earth's Recipe for Food

By Peterson, Cris

Boyd's Mills Press, 2012. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service! Summary: Once again, noted author Cris Peterson brings both wonder and clarity to the subject of agriculture, celebrating the cycle of growth, harvest, and renewal. Using the corn plant as an example, she takes the reader through the story of germination and growth of a small corn seed into a giant plant reaching high into the air, with roots extending over six feet into the ground. The book also discusses the makeup of soil and the amazing creatures who live there--from microscopic one-celled bacteria to moles, amoebas, and earthworms. David Lundquist's stunning photographs bring an immediacy and vibrancy to the seemingly miraculous process. Named an IRA Teachers' Choice-Recommended book; a Best Children's Book of the Year--Bank Street College of Education; American Farm Bureau Foundation Agriculture Book of the Year. Received the Ohio Farm Bureau Federation's Children's Literature Award.
