Reviews

This book may be worth purchasing. It typically fails to expense excessive. It is extremely difficult to leave it before concluding, once you begin to read the book.

Not illustrated. 1897 Excerpt: . . . visibly occurring in localities distant from each other, the topography of the two chief surface watersheds indicates the direction of the main discharge, the surface of the lands showing what were the directions of the lava flows and the consequent strata structure of the underground. The great watershed converges to Pearl Harbor. The next important one includes the shorter dip of the lands, formed from the great range, towards Waialua, supplemented by the Waianae altitudes, but it is apparent that the great body of the underground discharge seeks the sea around Pearl Harbor. According to the showing that has been arrived at it is seen that, in round numbers, some 100,000,000 gallons of water are leaving the island without rendering service, how can the power-equivalent of this water be estimated in the first place, one-fourth of the total, amount may be taken off as the portion of discharge from and including Nuuanu avenue to Makapuu Point, and this may be set apart to meet the most exorbitant demands that the future expansion of the city, with its coming sewerage system, and extensive garden cultures, can make. This amount is not only more than can be required; it is, we believe, more than the actual discharge of that region. Another one-fourth is deducted to cover the unmeasured wastes occurring along the windward and around the Kahuku sides of the island. The Waimea and Kawailoa streams and springs, which yield a large volume, are included...
