## Higher Moments in Perturbation Solution of the Linear-Quadratic Exponential Gaussian Optimal Control Problem

By Baoline Chen

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 32 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. The paper obtains two principal results. First, using a new definition of higher-order (2) matrix derivatives, the paper derives a recursion for computing any Gaussian multivariate moment. Second, the paper uses this result in a perturbation method to derive equations for computing the 4th-order Taylor-series approximation of the objective function of the linear-quadratic exponential Gaussian (LQEG) optimal control problem. Previously, Karp (1985) formulated the 4th multivariate Gaussian moment in terms of MacRaes definition of a matrix derivative. His approach extends with difficulty to any higher (4) multivariate Gaussian moment. The present recursion straightforwardly computes any multivariate Gaussian moment. Karp used his formulation of the Gaussian 4th moment to compute a 2nd-order approximation of the finite-horizon LQEG objective function. Using the simpler formulation, the present paper applies the perturbation method to derive equations for computing a 4th-order approximation of the infinite-horizon LQEG objective function. By illustrating a convenient definition of matrix derivatives in the numerical solution of the LQEG problem with the perturbation method, the paper contributes to the computational economists toolbox for solving stochastic nonlinear dynamic optimization problems. This item ships...

### Reviews

*It is one of my personal favorite ebooks. I was able to comprehend everything using this created ebook. I am just pleased to tell you that here is the greatest ebook I have got read through within my own lifestyle and may be the finest publication for possibly.*

-- Timothy Johnson DVM

*An extremely wonderful ebook with lucid and perfect explanations. I was able to comprehend almost everything using this composed publication. It is extremely difficult to leave it before concluding, once you begin to read the book.*

-- Kimberly Carroll
