Excerpt: . . . r the record. 317 NATIONAL ENERGY ISSUES ----- THURSDAY, JULY 19, 2001 U. S. Senate, Committee on Energy and Natural Resources, Washington, DC. The committee met, pursuant to notice, at 9: 30 a. m. , in room SD-366, Dirksen Senate Office Building, Hon. Jeff Bingaman, chairman, presiding. OPENING STATEMENT OF HON. JEFF BINGAMAN, U. S. SENATOR FROM NEW MEXICO The Chairman. We have a two-part hearing today. In the first half we will discuss legislative proposals to address some of the barriers that currently inhibit the market penetration of distributed generation technologies, including distributed power from renewable energy. This cluster of clean and efficient technologies includes fuel cells, wind, photovoltaics, and microturbines. In contrast to electricity produced at large central powerplants, which travels over transmission and distribution lines to reach the ultimate consumer, distributed generation is smaller in scale and produces electricity at or near the site where it is to be used. Distributed power is automatically 7 to 10 percent more efficient than central station power, because that is how much electricity is lost in the transmission process. It has become an increasingly attractive option for customers who demand a power source with high reliability and who want to control their peak demand or to use renewable energy. The second half of the hearing will address hydroelectric relicensing legislation. Non-Federal hydropower represents 5 percent of all electric power generated in the United States. It provides a far greater percentage of the electric power. . . This item ships from La Vergne,TN. Paperback.
