Forgotten Books, 2015. Paperback. Condition: New. Language: English . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. Excerpt from A New and General Biographical Dictionary, Vol. 8 of 12 Kepler (John), the greatest astronomer perhaps that any age has produced, was born in the Wiel in the dutch of Wirtemberg, the 27th Dec. 1751. His father, Henry Kepler, was descended from a family, which had raised themselves under the emperors by their military services, and was himself an officer of rank in the army; but afterwards, experiencing ill fortune, was obliged to sell all he had, and support himself and his family by keeping a public-house. He died in 1590, and left his son John to take what care of himself he could. His education had been hitherto neglected, as may easily be imagined; but, having a very great genius, and as great a desire to cultivate it, he entered upon his studies in philosophy at Tubingen, immediately upon his father s death, and, two years after, pursued the mathematics in the same university, under the famous Michael Moestlin. He made so great progress, and became so famous, that in 1503 he was invited to Gratz in Styria, to teach the mathematics there. He then applied himself entirely to astronomy, and published from time to time several works, the principal of which shall be mentioned immediately. In 1597, he entered into the married state, which at first created him great uneasiness, from a dispute which arose about his wife s fortune; and, the year after, he was banished from Gratz on account of his religion, but afterwards recalled, and restored to his former dignity. About the Publisher Forgotten Books publishes hundreds of thousands of rare...
